

AJLAL HAIDER KHAWAJA

SENIOR FRONTEND ENGINEER | React.js • Angular • TypeScript | Remote • UTC+4

Abu Dhabi, UAE (UTC+4) | +971 50 884 0071 | ajlalkhawaja1@gmail.com | [linkedin.com/in/ajlal-haider-khawaja](https://www.linkedin.com/in/ajlal-haider-khawaja)

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8+ years of experience independently delivering scalable, responsive and accessible web applications using React.js, Angular, TypeScript, JavaScript and Redux. Strong background in reusable component architecture, REST API integration, performance optimization, code reviews and cross-functional Agile delivery. Built healthcare, government and enterprise solutions for SEHA, ADIO, the Central Bank of the UAE, ADNOC, MODON, ADNEC and the Abu Dhabi Department of Finance. Based in the UAE (UTC+4), available immediately and open to international remote employment or contract opportunities.

TECHNICAL SKILLS

Frontend: React.js, Angular, AngularJS, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/LESS, jQuery

UI Engineering: Responsive design, reusable components, design systems, Angular Material, Bootstrap, accessibility (WCAG), cross-browser compatibility

Integration & Performance: RESTful APIs, authentication workflows, lazy loading, code splitting, rendering optimization, real-time dashboards

Tools & Delivery: Git, GitHub, Webpack, Figma, Adobe XD, Adobe Photoshop, Jira, Agile, Scrum, UAT and production-release coordination

PROFESSIONAL EXPERIENCE

Frontend Developer

Nov 2024 - Present

Smart Vision for Information Systems | Abu Dhabi, UAE

- Deliver React and Angular frontend applications for major UAE healthcare, government and enterprise clients, including SEHA, ADIO, the Central Bank of the UAE and the Department of Finance.
- Designed and implemented a new responsive frontend layout for the SEHA Surface tablet application, supporting tablet-focused workflows and consistent usability across devices.
- Build reusable components and bilingual English/Arabic interfaces for tablet, kiosk and desktop applications using React, Angular, TypeScript, Redux and SCSS.
- Integrate REST APIs, authentication flows, reporting modules and real-time data across healthcare, attendance, space-management and operational dashboards.
- Improved page-load performance by more than 40% through lazy loading, code splitting, optimized rendering and efficient state management.
- Translate Figma and Adobe XD designs into accessible, responsive and production-ready interfaces aligned with client requirements and WCAG practices.
- Coordinate UAT validation, production releases and issue resolution with backend engineers, project managers and client stakeholders in Agile delivery teams.

Consultant Frontend Developer

May 2018 - Nov 2024

Systems Limited | Lahore, Pakistan

- Delivered full-cycle frontend development for enterprise and government-facing applications across more than six years.
- Architected scalable Angular and React applications and implemented Redux for predictable application state management.
- Built reusable component libraries and consistent styling systems using SCSS and Angular Material across multiple product lines.
- Integrated REST APIs and real-time data feeds while improving perceived performance through component lifecycle and rendering optimization.
- Conducted code reviews, mentored junior developers and documented frontend standards, reusable patterns and design-system guidance.
- Contributed to requirements analysis, sprint planning, stand-ups, retrospectives and backlog refinement within Agile/Scrum teams.

SELECTED ENTERPRISE & GOVERNMENT PROJECTS

SEHA Digital Healthcare & Visa Screening Applications | SEHA

Frontend delivery for healthcare and visa-screening workflows, including a redesigned Surface tablet interface, responsive layouts, multilingual UI and integration with application services.

Technologies: React.js, JavaScript, Redux, HTML5, CSS3/SCSS, REST APIs, responsive tablet UI

Digital Service Applications | Abu Dhabi Investment Office (ADIO)

Frontend implementation and enhancement of responsive digital-service interfaces, translating business and UI requirements into reusable, production-ready components.

Technologies: React.js, TypeScript/JavaScript, HTML5, SCSS, REST APIs, Figma

Space Management System | Central Bank of the UAE

Developed interactive floor-plan interfaces and real-time space-tracking workflows for headquarters operations, with responsive data visualization and API-driven updates.

Technologies: Angular, TypeScript, SCSS, REST APIs, interactive floor plans

Government Finance Portal | Abu Dhabi Department of Finance

Implemented and maintained responsive portal interfaces, resolved production and UAT differences, and coordinated release validation with client and backend teams.

Technologies: Angular/JavaScript, HTML5, CSS3, REST APIs, UAT and production support

Enterprise Portals & Operational Workflows | ADNOC, MODON and ADNEC

Delivered modular dashboards, industrial-zone interfaces and event-management workflows for high-profile UAE enterprise and government environments.

Technologies: Angular, React.js, TypeScript, Angular Material, SCSS, REST APIs

Smart Attendance & Reporting System | UAE Government

Built real-time attendance dashboards, employee workflows, API-driven reporting and responsive interfaces for operational users and management teams.

Technologies: React/Angular, JavaScript, REST APIs, dashboards, dynamic reporting

Digital Interface Modernization | Abu Dhabi Police

Updated interface designs in Figma and developed a React proof of concept to convert legacy HTML/CSS screens into a reusable, component-based frontend structure.

Technologies: React.js, JavaScript, HTML5, CSS3/SCSS, Figma, component architecture

REMOTE ENGINEERING & DELIVERY

- Independent frontend ownership from requirements and UI review through implementation, UAT and production release.
- Clear collaboration with designers, backend engineers, project managers and client stakeholders across Agile workflows.
- Git-based delivery, code reviews, reusable component documentation and maintainable frontend standards.
- Available from the UAE (UTC+4) with working-hour overlap across EMEA and selected APAC time zones.

EDUCATION

MPhil, Electrical Engineering - Telecommunication Specialization | 2016 - 2018

University of Management and Technology (UMT), Lahore, Pakistan

BS, Electrical Engineering | 2011 - 2015

University of Management and Technology (UMT), Lahore, Pakistan

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Angular - The Complete Guide (2022 Edition), Udemy | 2023
- The Complete JavaScript Course 2022: From Zero to Expert, Udemy | 2023
- Ultimate HTML, Codefinity

ADDITIONAL INFORMATION

Languages: English - Professional proficiency | Urdu/Hindi - Native

Work Authorization: UAE Golden Visa; open to international remote employment and contract opportunities

Availability: Immediate | International remote roles | UAE time zone (UTC+4)
